Waveforms

Waveforms is a series of downloadable sample libraries from Something Else Music Limited. This company is run by the well respected UK sound designer Ian Boddy who has been producing sample libraries since 1992. His work includes Ambient Volumes 1 & 2, Malice in Wonderland, Morphology, Analogue Sequencer Loops & Outer Limits for Zero-G and Transmission-X for Sample Magic. He has also provided patch & sample content for LinPlug, Camel Audio & Rob Papen Soundware.

His musical career actually goes all the way back to 1980. Since then he has released over 30 solo & collaborative CDs, performed over 100 concerts in the UK, Europe & the USA and runs the highly respected ambient music label DiN which has currently released 31 CDs. Furthemore he also composes library music for the UK's largest independent library music company DeWolfe having written 10 such titles for them to date.

With such a wealth of musical and sound design experience Boddy has finally decided to release his sample productions independently. These products will be marketed under the "Waveforms" banner and will comprise a series of tightly focused sample packs that will only be available in download format. This modern form of product distribution enables costs to be kept down and thus customers can purchase the sounds they want at a very reasonable price. Furthermore they can be purchased from some of the most respected on-line sample stores at any time.

All the Waveforms libraries are comprised of 500 - 600Mb of 44.1KHz, 24 Bit WAV files. For your convenience Native Instruments Kontakt 2 patches are also provided for each sample as well as audition programs for all the sounds in a single category where the individual samples are mapped out one per key ascending from C1.

Radiophonica

Radiophonica is the first title in Ian Boddy's Waveforms series of sample libraries. All the sounds were produced and recorded directly from analogue hardware synthesisers. No digital processing other than a touch of EQ or compression where appropriate was used. Any effects you hear such as flanging, phasing, reverb or echo are from the various analogue components of the modular systems used. The intention was to provide a library of sounds that are synonymous with the name of the Radiophonic Workshop from their early work on such seminal programs as Doctor Who. As such the sounds are intended to have that analogue, organic, retro sci-fi character that many find so appealing about those early synthesiser soundtracks.

The Kontakt 2 programs are a simple C0 - C6 keyspan with C3 as the root key and a basic envelope and low-pass filter provided. The modulation wheel is set to turn the cut-off of the filter down as it is raised. No other programming is included as the sounds themselves are "finished" and it is intended to give the customer the flexibility of adding their own effects and modulations if desired.

Installation

Simply unzip the downloaded file and place where you wish on your hard drive(s). If you intend to use the Kontakt 2 programs then please leave the internal folder structure intact so that the instruments can find the relevant samples. The WAV files and Kontakt patches are prefixed with the RP identifier.

Technical Data

200 samples at 44.1Khz, 24 bit in WAV format .
Mono samples, cross-fade looped where appropriate.

Raw audio recorded from the following analogue synthesisers:
Roland System 100-M
Analogue Systems
Doepfer A-100
Analogue Solutions
VCS3
Minimoog
Metasonix TM-2 tube BP filter

Recorded directly into Apple Mac using RME Fireface 400 audio interface.
Samples processed in Logic Pro 8 and edited in Bias Peak Pro 5.

Native Instruments Kontakt 2 support provided.

Additional processing provided by:
Audioease Periscope
Waves RCompressor & L1 Limiter

Recorded & produced by Ian Boddy July - October 2008.

License Agreement (EULA)

The samples, loops and sampler program files included in this sample library are licensed to you, not sold to you by Something Else Music Limited. All rights not expressly granted to the user are reserved. Only the original purchaser of this sample library has a legal right to use these samples, loops and sampler programs within their own original music compositions and/or in advertisements, soundtracks, and television or film productions. The product can be installed on multiple computers as long as the intended user is the original purchaser of this product.

The content may be used for commercial and non-commercial use. However, it may not be used in the creation of any competitive product, such as a Sample Pack, Sample CD, Sample DVD, Virtual Instrument, Expansion Pack, or any other collection of sound or loop elements in any format.

These samples and loops may not be used "isolated". They must be used within the context of a musical piece mixed with additional parts. You may not re-sell this collection or pass it on to a third party as this license is non-transferable.

All copying, lending, duplicating, re-selling, renting, uploading, file sharing or unlawful trading of this content (or any part of this content) is prohibited by international copyright law. We will not hesitate to take legal action against any person or company that fail to adhere to the terms of this agreement. If you have any questions about this license or you wish to report an individual who has flouted the terms of this agreement, then please contact us.

Installation of this product constitutes full acceptance of these terms.

Marketing & Design
